Dataset time horizon May 1, 2020 -
November 30, 2020
These are split into separate csv files
of interval 15 days

Tweets of every individual in the dataset

States of each tweet
(used for US map
visualization)

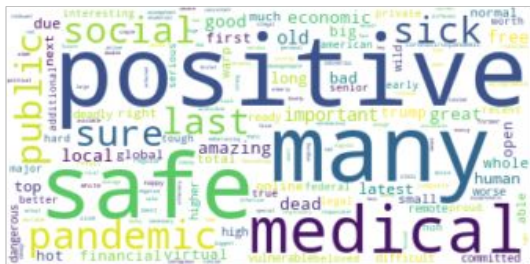

Each csv file has 260,000-300,000
tweets

The Dataset - Flowchart

What do people
talk about when
they tweet about
COVID-19?

Most Mentioned Words by Month

May 2020

June 2020

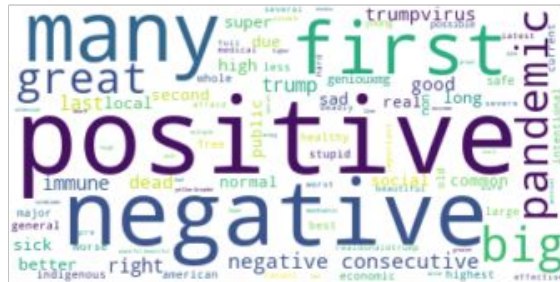

July 2020

Most Mentioned Words by Month

Sept 2020

Nov 2020

Aug 2020

October 2020

Sentiment Analysis

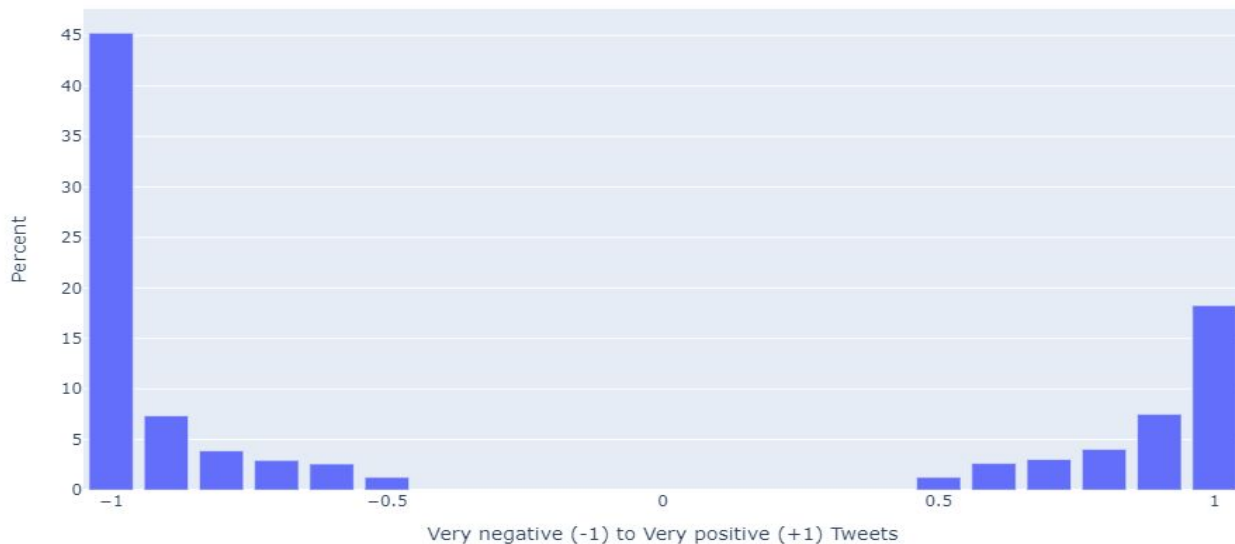

Flair - LSTM neural network

Polarity scores: [-1, -0.5], [0.5, 1]

Sentient Polarity Distribution

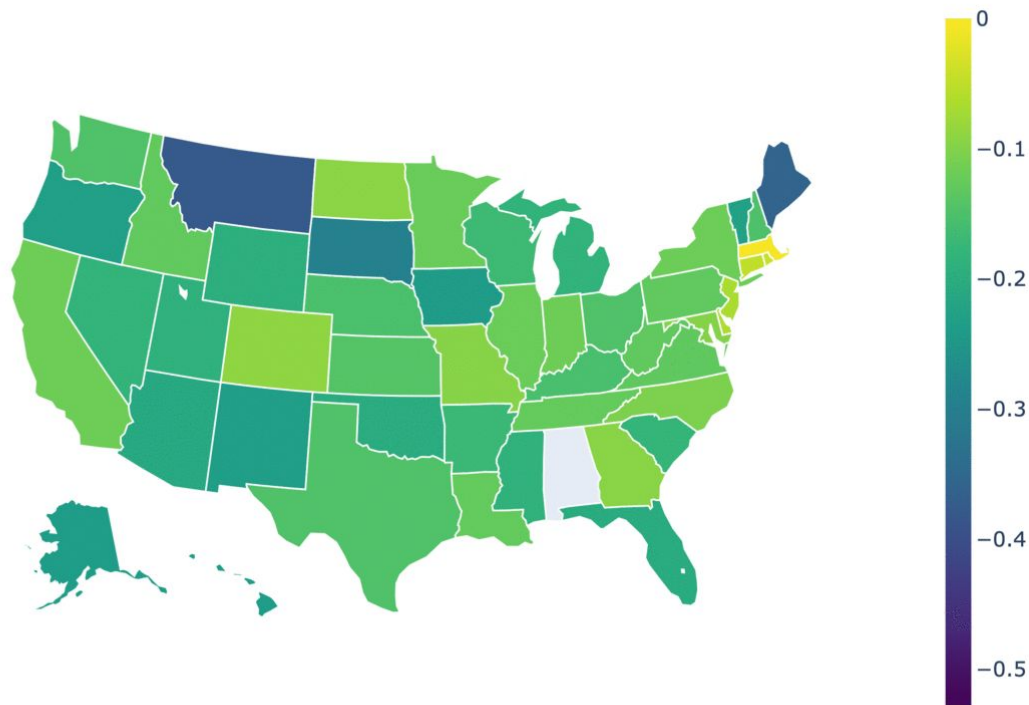

Do people tend to express negative feelings or positivity?

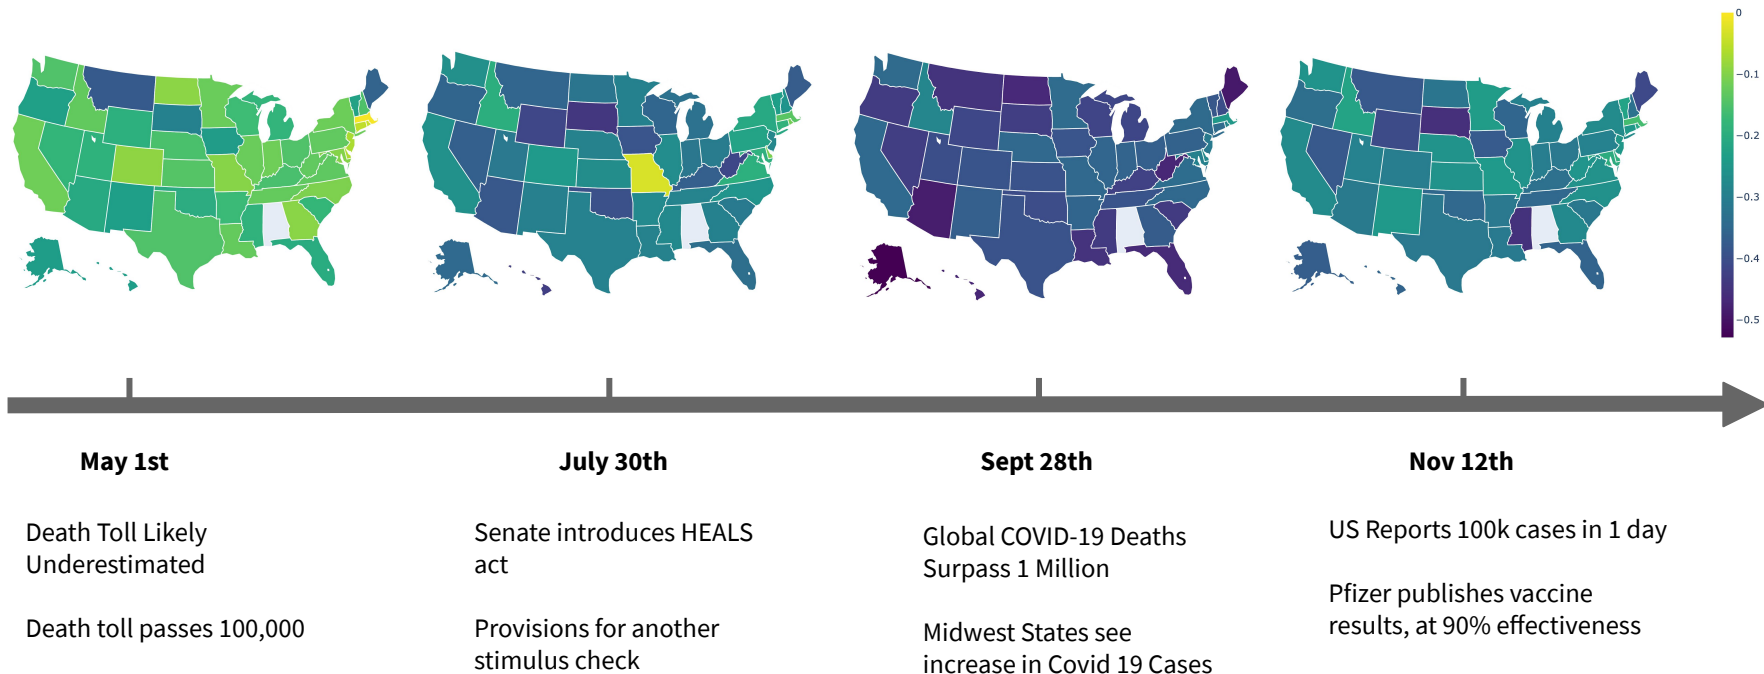

How do people in
different states
react differently?

Sentiment Analysis - Flair - US Map

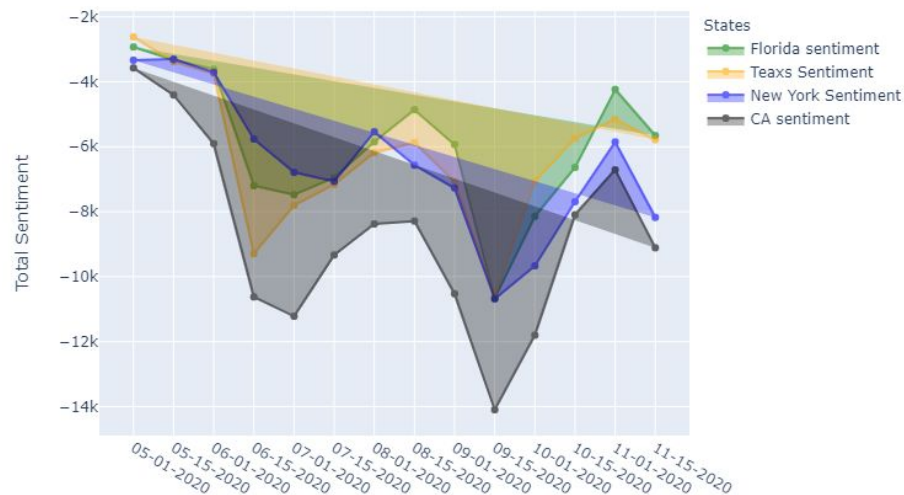

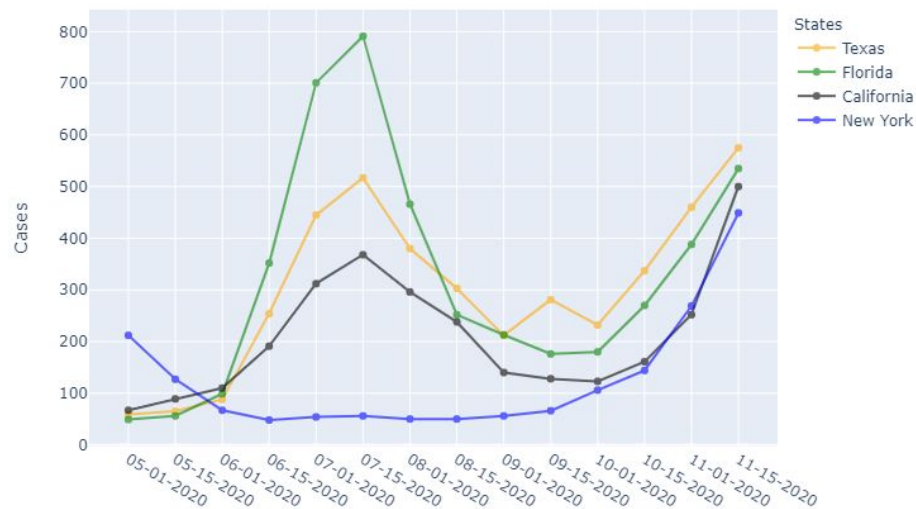

Mean Sentiment Scores: 2020-05-01

What happened on these dates?

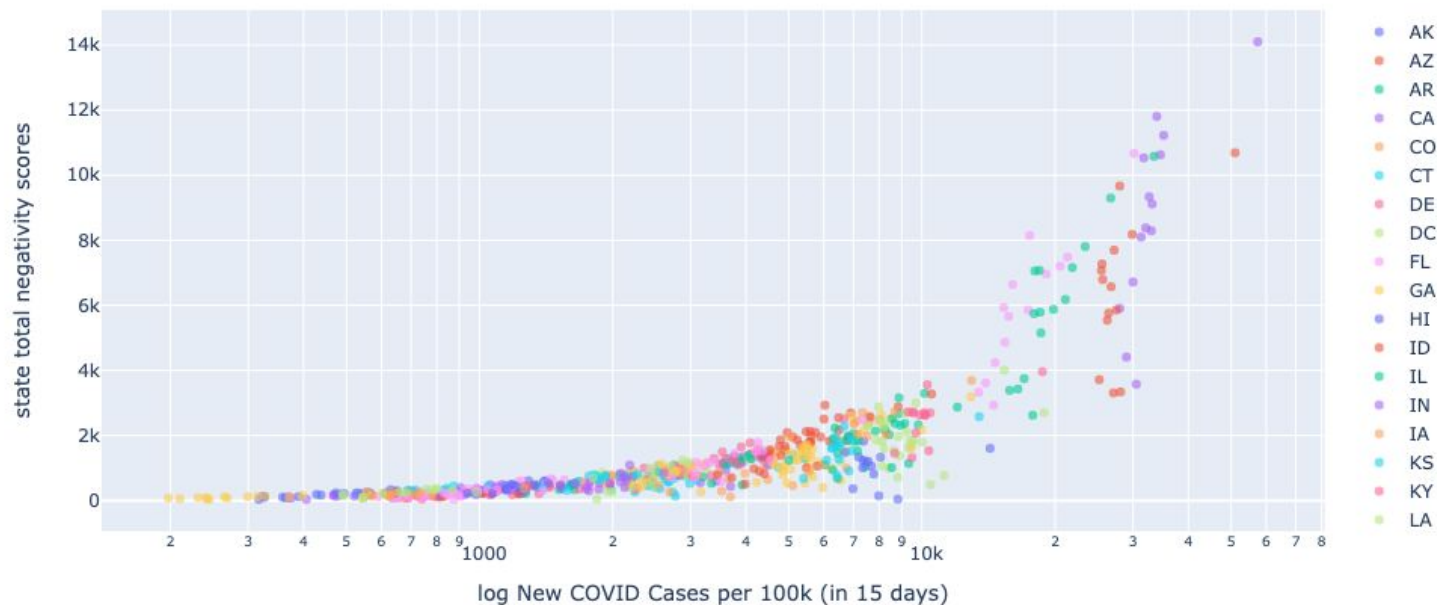

Zooming in... New case per 100k

Are sentiment & covid cases correlated?

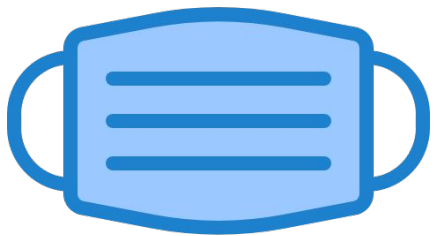

Negative total sentiment scores by state: correlation = 0.9397

Are sentiment & covid cases correlated?

Negative mean sentiment scores: correlation = 0.1457
